

Competitive Analysis

VirtCraft + v9s vs KubeVirt Management Alternatives

How our integrated CLI + Web platform compares to Cockpit, OpenShift Console, kubectl, virtctl, and other KubeVirt management tools.

Feature-by-Feature Comparison

vs Cockpit Machines

Red Hat's web console for libvirt/KubeVirt VM management.

Feature	Cockpit Machines	VirtCraft + v9s
KubeVirt native	No (libvirt focused)	Yes (K8s API native)
VNC Console	Yes	Yes + Sendkey toolbar
Serial Console	Limited	Full xterm.js
SSH Console	No	Yes (web-based)
Real-time metrics	Basic (polling)	WebSocket streaming
Snapshots	libvirt only	KubeVirt VirtualMachineSnapshot
ISO mount	Broken (dialog doesn't close)	Modal with error handling
Add network	Broken	Pod/Multus + Bridge/Masquerade/SR-IOV
Host hardware (PCI, RAM)	No	dmidecode + lspci
Disk partitions	storaged (separate)	Integrated with usage bars
CLI tool	No	VirtCraft (60+ commands)
Templates	No	44 OS templates
Multi-VM blueprints	No	LAMP, K8s, 3-tier, CI/CD
Delete VM closes panel	Broken	Auto-close via vmStore

vs OpenShift Console

Red Hat OpenShift Virtualization console.

Feature	OCP Console	VirtCraft + v9s
Prerequisite	Full OpenShift cluster (\$\$\$)	Any K8s + KubeVirt
License cost	\$50K-200K/year	Proprietary (competitive)
VNC Console	Yes	Yes + Sendkey
VM lifecycle	Yes	Yes + CLI (60+ commands)
Metrics	Prometheus required	Built-in (no setup)
Host hardware info	No	PCI, RAM, partitions, services
Standalone deployment	No (OCP only)	Single binary + static files
Edge/K3s support	No	Yes (K3s, K8s, any distro)
Blueprints/Templates	Templates only	44 templates + multi-VM blueprints
Binary size	Full OCP platform	49MB (v9s) + 11MB (virtcraft)

vs **kubectl** / **virtctl**

Generic Kubernetes and KubeVirt command-line tools.

Feature	kubectl + virtctl	VirtCraft CLI
VM-specific commands	Generic K8s + basic VM	60+ VM-specific commands
OS templates	None (raw YAML)	44 built-in templates
Resource profiles	None	8 profiles (dev, prod, db, web, etc.)
Multi-VM blueprints	None	LAMP, K8s, 3-tier, CI/CD
Health checks	No	Scoring + recommendations
Config management	Manual YAML	save, load, list, diff
Interactive TUI	No	Dashboard, VM list, details, snapshots
Clone VM	Manual	One command
Validation	Schema only	Full config validation
Webhooks	No	Event webhooks
RBAC/Tenants	K8s RBAC	Built-in tenants, users, roles, quotas
REST API server	No	Built-in API + OpenAPI spec

60+

VirtCraft Commands

OS Templates

0

YAML Required

Why Choose Us

The only integrated CLI + Web platform for KubeVirt.

CLI Power (VirtCraft)

60+ commands, 44 templates, 8 profiles, multi-VM blueprints, TUI dashboard, health checks, RBAC, webhooks, API server. No YAML needed.

Web Ease (v9s)

VNC/Serial/SSH console, real-time metrics, snapshots, ISO mount, network management, host hardware, services. No kubectl needed.

Lightweight

60MB total (VirtCraft 11MB + v9s 49MB). Runs on K3s at the edge. No OpenShift, no Prometheus, no external dependencies.

Migration Ready

Integrates with hyper2kvm + hypersdk. Complete pipeline: export → migrate → manage via CLI or web.

The complete KubeVirt management platform

No OpenShift license. No broken Cockpit dialogs. No raw YAML.
Just VirtCraft + v9s. CLI + Web. Done.
